PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of hands-on experience building and shipping production systems end to end, with particular depth in Laravel/PHP and TypeScript. Built and currently maintain a live, multi-tenant Laravel platform for a milk cooperative, integrating M-Pesa (Daraja) payments and SMS gateways for real-time transactions and notifications. Comfortable owning features across the full stack - Laravel back-end, Angular/TypeScript and React front-end, and Flutter mobile - with strong SQL database design (MySQL/PostgreSQL), REST API development, secure-coding practices, and CI/CD workflows. AWS Cloud Practitioner certified, with a consistent record of improving system reliability and delivering measurable operational impact in multi-office and enterprise environments.

TECHNICAL SKILLS

- **Back-End:** Laravel/PHP (advanced), Node.js, Express.js, ASP.NET Core (.NET current LTS), .NET Framework, Python (Django), RESTful API design & integration
- **Front-End:** TypeScript (advanced), Angular, React.js, HTML5, CSS3, JavaScript, Vue.js (familiar)
- **Mobile Development:** Flutter, React Native (familiar)
- **Payments & Messaging Integrations:** M-Pesa/Daraja API, SMS gateway integration, third-party API integration
- **Database Management:** MySQL, PostgreSQL, MongoDB, SQL Server, schema design, multi-tenant architecture, query optimization, backups & redundancy
- **Hosting & Cloud:** AWS (Cloud Practitioner Certified), Azure, Digital Ocean, server provisioning & configuration, Docker (familiar), SSL certificates, firewalls
- **Security & Access:** RBAC, OAuth 2.0/JWT, endpoint security, secure-coding & data-protection practices, backup & disaster recovery
- **Tools & DevOps:** Git, CI/CD concepts (Jenkins, GitLab CI/CD), Postman, Trello, Agile/SDLC
- **Monitoring & Reporting:** Power BI, uptime & server-health monitoring, analytics reporting, ICT documentation & SOPs

KEY PROJECTS

Multi-Tenant Milk Cooperative Management System *Ongoing -Live in Production*

Independent / Freelance Project - Laravel, MySQL, M-Pesa (Daraja), SMS Gateway

- Designed and built a live, multi-tenant Laravel platform serving multiple milk cooperative societies from a single codebase, with tenant-isolated data and configurable business rules per society.
- Integrated M-Pesa (Daraja API) for automated farmer payments and transaction reconciliation, and an SMS gateway for real-time delivery, payment, and account notifications to farmers.
- Handled the full build independently: database schema and multi-tenancy design, back-end business logic, API integrations, deployment, and ongoing production support.

PROFESSIONAL EXPERIENCE

Senior Developer Consultant -ERP Systems
2026 -Present

Razzo Africa Ltd

- Provide senior-level consultancy for enterprise resource planning (ERP) system development and deployment using the MERN stack and .NET Framework, covering desktop and mobile applications built with Flutter.
- Migrated legacy backend services to ASP.NET Core on .NET (current LTS), enabling cross-platform deployment, cleaner containerization, and stronger messaging and gRPC support as a clean break from the older .NET Framework backend.
- Architect and implement RESTful API integrations, relational database schemas, and multi-branch security frameworks; support infrastructure configuration and system stability for enterprise clients.
- Collaborate with cross-functional program teams to identify operational inefficiencies and design practical digital solutions, translating complex technical requirements into user-friendly, scalable systems.
- Lead staff enablement and knowledge-transfer sessions for deployed ERP systems, driving organizational capacity building and long-term technology self-sufficiency across client organizations.

ICT Manager & Systems Administrator
February 2024 -Present

Eastlands College of Technology

- Serve as first-line IT and applications support for 100+ staff and students across in-person and remote sessions, resolving hardware, software, and network incidents; increased system availability from 75% to 95% through proactive maintenance and redundancy planning.
- Administer Windows and Linux servers, manage Active Directory, enforce role-based access controls (RBAC), and maintain robust backup and disaster recovery processes ensuring operational continuity.
- Manage LAN/WAN infrastructure, routers, switches, and wireless access points; reduced network downtime by 20% through proactive server optimization and continuous monitoring.
- Deployed an internal service desk ticketing and monitoring system, improving ICT response time by 65% and enabling structured escalation and SLA tracking.
- Champion digital innovation and AI tool adoption across programs, and delivered structured ICT training to 400+ staff and students under the Samsung Innovation Campus program, strengthening institutional digital literacy.

ICT Officer & Software Developer
October 2022 -January 2024

The Companionship of Works Organization (CoWA)

- Developed and deployed custom web applications to automate manual workflows, reducing reporting time by 60% and freeing staff capacity for programmatic work.
- Built secure RESTful APIs with OAuth 2.0 and JWT authentication, integrating front-end interfaces with back-end services and third-party systems.
- Managed digital infrastructure and secure communication systems for multi-office field operations, ensuring reliable connectivity and compliance with organizational security standards.
- Created and maintained comprehensive ICT documentation, including system manuals, SOPs, and user training materials to support knowledge transfer and system continuity.

Junior Software Developer
May 2020 -September 2022

Fort Sort Innovations

- Supported the full software development lifecycle (SDLC) - design, development, testing, deployment, and maintenance - for business applications across multiple client branches.
- Diagnosed and resolved application and network-related issues, minimizing downtime and enhancing end-user satisfaction through timely, solution-focused support.

- Managed system migrations and data backups, ensuring data integrity during infrastructure upgrades.

ICT Intern *October 2021 -September 2022*

Ministry of Education -Tana River County

- Supported the Digital Literacy Program (DLP) by installing and maintaining ICT equipment in schools across the county.
- Provided technical support to educators and conducted training on e-learning platforms, fostering digital adoption within learning institutions.

EDUCATION

Bachelor of Science in Information Technology
Kenyatta University | September 2015 -December 2019 | 2nd Class Upper Division

CERTIFICATIONS

- AWS Cloud Practitioner -AWS
- MERN Stack Development -Power Learn Project (PLP)
- Web Developer - eMobilis
- SQL & Database Management - Hubblemind Labs
- Data Analysis (Power BI) -Bounty Analytica

KEY ACHIEVEMENTS

- Built and maintain a live multi-tenant Laravel platform with M-Pesa and SMS integrations for a milk cooperative, handling real-money transactions in production.
- Increased ICT system availability from 75% to 95% through proactive maintenance and redundancy planning.
- Improved ICT response time by 65% via deployment of an internal ticketing and monitoring system.
- Reduced network downtime by 20% through proactive server optimization strategies.
- Reduced manual reporting workflows by 60% at CoWA through targeted workflow automation solutions.
- Delivered ICT training to 400+ staff and students, strengthening user competency and digital adoption.
- Led migration of ERP backend services to ASP.NET Core on .NET (current LTS) at Razzo Africa, improving cross-platform deployment and containerization readiness.
